QUALITY POLICY

ALTIRRATECH LTD, operating in the field of engineering design, consultancy and development within the technological and industrial sectors, considers quality a strategic and fundamental value for its business.

The Management, through its delegate Roberto Ruggeri, is committed to defining, implementing, maintaining, and promoting a Quality Policy consistent with the organization's context, objectives, and stakeholder expectations.

Guiding Principles of Our Quality Policy

1. Customer Satisfaction

We are committed to continuously understanding and meeting the needs, expectations, and requirements of our public and private clients, providing customized, reliable, and timely technical solutions.

2. Continuous Improvement

We promote a corporate culture focused on the continuous improvement of our performance, processes, and professional skills, through training activities, technical exchange, and innovation.

3. Technical Quality and Reliability

We provide engineering services based on methodological rigor, cross-sector experience, and mastery of applicable regulations, to ensure safe, effective, and sustainable solutions.

4. Regulatory Compliance and Operational Integrity

We ensure constant compliance with laws, applicable technical regulations, and international standards (e.g., ISO 9001, EU directives), operating with transparency, fairness, and responsibility.

5. Engagement and Valorization of Resources

We actively involve collaborators, consultants, and suppliers, fostering professional relationships based on trust, respect for skills, and shared goals.

Policy Application and Review

This Policy is:

- Disseminated at all organizational levels;
- Communicated to collaborators and relevant interested parties;
- Displayed in the company's virtual and physical environments (e.g., intranet, contracts, proposals);
- Subject to periodic review by Management during the management review to ensure its ongoing adequacy and consistency with the evolving context.
